Summary:

A full stack developer with a certificate from University of Adelaide – Bootcamp, looking for a job either in the IT Pharmacy or IT industry where I can showcase what I have learned in Bootcamp coding.

Newly graduate but passionate and keen to learn more about programming. Have patience, willing to collaborate and flexible.

Technologies:

- HTML, CSS, JS, Bootstrap, Bulma, JSON
- MySQL, MongoDB, GitHub
- Express, Node, Handlebars

Projects:

- Password Generator – this project will enable the user to generate a random password.
  - Deployed URL: https://joannejavillo.github.io/password-generator/

- The Javascipt timed Quiz – in this project the user will enable to take a quiz regarding javascript with a time limit.
  - Deployed URL: https://joannejavillo.github.io/javascript-the_timed_quiz/

Collaborative Projects:

- Searchify – an application that will enable user to search for an upcoming events of an artists in a specific city.
  - Deployed URL*:* https://travis297.github.io/Searchify/

- DCODE - modern tool for developers, specifically full-stack developers. It includes many helpful function documentations. The aim is to create an encyclopedia of codes to help beginners and advanced developers alike.
  - Deployed URL: https://arcane-waters-44478.herokuapp.com/

Education:

Coding Bootcamp – University of Adelaide   November 2020 – June 1, 2021

Brand Statement:

Full stack developer with a pharmacy background that is focused on building web applications that can be useful to the industry.

Just finished Coding Bootcamp with a certificate in full stack development from University of Adelaide.

A newbie but passionate and always eager to learn something new in coding.
